Solutions in Print

More Pace!

Less Space!

Repro-genius!

The Coolest **compact system** in Reprographics

Océ ColorWave 300

New Océ Colorwave 300, jump ahead to the fast lane with a single foot print reprographics power house!

One single space in your business is now all that you have to dedicate for all your wide format needs. The Colorwave 300 prints, copies and scans in both black and white and full colour, Never again will you need to have separate systems for your plan printing, maps and posters, scanning to file or copying originals, in fact the only concern is the queue that will now form as everyone will want to, and can use it easily and quickly!

Long gone are the days of bending down to collect output from floor level or those that have fallen behind the device, its all front access and recovery complemented with the best copy and scan software available, ensure colour matching and reproduction without trial and error or IT intervention. A simple walk up interface commands all operations and lets standard activities be saved as templates for further efficiency gains in operation, altogether in a neat package for those who do up to 20,000 meters of output per year.

The ColorWave 300 is;

- **£16,575.00 ex VAT* (List Price £19,173.00) delivered & installed !**
